

Katalon Studio For Automated Testing

Sesi 11

Final Projects : Environments Preparations

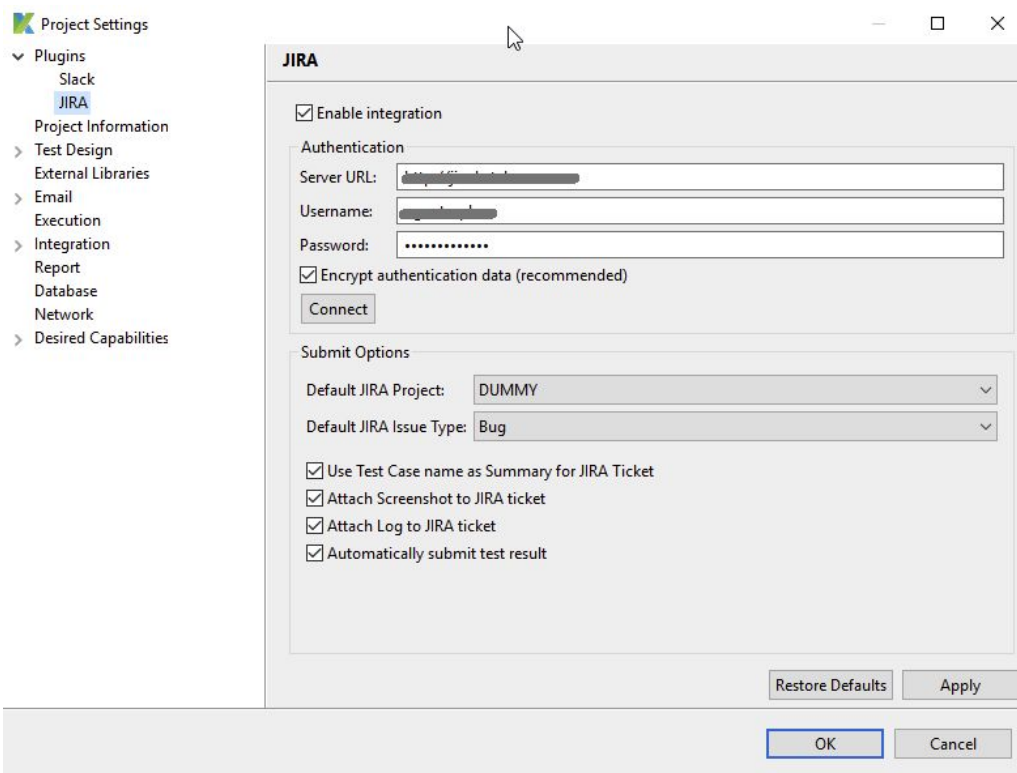

INTEGRATION WITH Jira

Prerequisites

- Install Jira Integration plugin for Katalon Studio from Katalon Store.

INTEGRATION WITH Jira

You need to enable JIRA Integration in order to submit issues to JIRA. This setting is available at Project > Settings > Integration > JIRA.

The screenshot shows a 'Project Settings' dialog box with a sidebar on the left and a main content area on the right. The sidebar lists various settings categories: Plugins (with sub-items Slack and JIRA), Project Information, Test Design, External Libraries, Email, Execution, Integration, Report, Database, Network, and Desired Capabilities. The 'JIRA' option under 'Plugins' is selected. The main content area is titled 'JIRA' and contains the following settings:

- ☒ Enable integration
- Authentication**
 - Server URL: [text field]
 - Username: [text field]
 - Password: [password field]
 - ☒ Encrypt authentication data (recommended)
 -
- Submit Options**
 - Default JIRA Project: DUMMY [dropdown arrow]
 - Default JIRA Issue Type: Bug [dropdown arrow]
 - ☒ Use Test Case name as Summary for JIRA Ticket
 - ☒ Attach Screenshot to JIRA ticket
 - ☒ Attach Log to JIRA ticket
 - ☒ Automatically submit test result

At the bottom of the dialog, there are buttons for 'Restore Defaults', 'Apply', 'OK', and 'Cancel'.

ENVIRONMENTS

Di sesi kali ini, Sebagai Preparation untuk Final Projects di sesi berikutnya , silahkan buat environment testing mencakup :

1. Push Katalon (No. 2) ke Github
2. Lakukan Integrasi dengan JIRA

Setelah Menyiapkan Environment silahkan Buat Dokumentasi detail masing2 point yang disebutkan diatas dengan menyertakan screenshot dan dikumpulkan pada KODE.id sesi 11.
